Foreword

This standard replaces GB/T 13383-1992 "eating peanut cake, meal." This standard compared with GB/T 13383-1992 main changes are as follows:

- Modify the normative references;
- Original standard sensory requirements and physical and chemical indicators merged into quality indicators;
- Cancel the original standard "peanut cake physical and chemical indicators" in the "Processing temperatures" project;
- Canceled the raw material requirements of the "red residue rate" indicators;
- Canceled Appendix B;
- Increased inspection rules;
- Increased provisions relating to the identification label. Appendix A of this standard is a normative appendix. The standard proposed by the National Food Authority. This standard by the National Standardization Technical Committee OILS. This standard was drafted. State Grain Reserve Xi'an Oil Research and Design Institute. The main drafters of this standard. Meng Orange, Xiatian Wen, Fang Yan Ni. This standard replaces the standards previously issued as follows:
- GB/T 13383-1992. Eating peanut cake, meal

1 Scope

GB/T 13383-2008 is the Chinese national standard on edible peanut cake and meal, in the field of food technology. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 4 November 2008 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 February 2009. Classification: ICS 67.060, CCS B23. This page is

published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the consumption of peanut cake, meal-related terms and definitions, classification, requirements, test methods, inspection rules, labels, logos and packages Loading, storage and transportation requirements. This standard applies to edible commodities for food industry peanut cake, meal.
