What this standard covers

This standard specifies the undamped accelerometers mounted on a steel block Resonance frequency testing of technical requirements and test methods. This standard applies to the quality of less than 30g, the frequency range of 1 ~ 50kHz undamped piezoelectric accelerometer.

Document data

International classification (ICS): 17.16.

Chinese classification (CCS): L15.

Estimated length of the Chinese original: 3,367 words.

Adopted international standard: ISO 5347-14-1993, MOD.
