What this standard covers

This standard specifies: agriculture and forestry tractors and self-propelled machinery the air conditioning, heating and ventilation systems work in a particular environment, driver's working environment temperature and humidity measurements uniform test methods. Due to the machine outside heat sources (such as solar) influence, This method can not fully determine the driver's work climate. Suggested GB/T 13877. 3 and the standard unite, to more precisely determine the enclosed cab heat load. The standard also specifies the machine enclosed cab air conditioning, heating and ventilation systems the minimum performance requirements.

Document data

International classification (ICS): 65.060.10.

Chinese classification (CCS): T69.

Estimated length of the Chinese original: 10,181 words.

Adopted international standard: ISO 14269-2-1997; IDT.
