What this standard covers

This standard specifies the DC amplifier characteristics and test methods. This standard applies to nuclear measuring device amplifies weak signals DC current DC amplifier, such as ionization chamber weak current signal generated by the high resistance of the current source, the scope of $10^{-6} \sim 10^{-1} \text{ A}$. DC amplifier may be a single or as part of another instrument.

Document data

International classification (ICS): 33.160.10.

Chinese classification (CCS): F81.

Estimated length of the Chinese original: 16,193 words.

Adopted international standard: IEC 60527-1975, NEQ.
