9 Annex C (informative) Environmental test test content	11

Foreword

GB/T 14093 "Environmental technical requirements of machinery products" includes the following seven sections.

--- GB/T 14093.1 Environmental technical requirements of machinery products hot and humid environment

--- GB/T 14093.2 Environmental technical requirements of machinery products cold environment

--- GB/T 14093.3 Environmental technical requirements of machinery products high altitude environment

--- GB/T 14093.4 Environmental technical requirements of machinery products for the industrial corrosion environment

--- GB/T 14093.5 Environmental technical requirements of machinery products dry heat environment

--- GB/T 14093.6 Environmental technical requirements of machinery products Marine Environment

--- GB/T 14093.7 Environmental technical requirements of machinery products mine environment This section GB/T 14093 Part 7. This Part replaces GB/T 15621-1995 "Environmental technical requirements of machinery products with the mine environment." Section compared with the GB/T 15621-1995, the main change this as follows:

--- According to GB/T 1.1-2000 "Standardization Guide Part 1. Structure and rules are written standard" requirements of the grid layout The formula has been modified;

--- "This standard" to "this Part";

--- A reference to the standard has been updated. This section of the Appendix A, Appendix B, Appendix C are informative appendices. This part of the National Electrical and Electronic Products Environmental conditions and environmental tests for Standardization

Technical Committee (SAC/TC8) and focal points. This section is drafted. Guangzhou Electric Apparatus Research Institute. The main drafters of this section. Liu Kuifang, Xieyong Qian, Li Yang, now, Xiao Li. This part of the standard replaces the previous editions as. GB/T 15621-1995. Environmental technical requirements of machinery products Mining environment

1 Scope

GB/T 14093.7-2009 is the Chinese national standard on environmental technology requirements of machinery products for mine environments, in the field of testing. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 6 May 2009 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 November 2009. Classification: ICS 19.020, CCS A21. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This section provides mining machinery Industrial Products (hereinafter referred to as the product) protection types and environmental conditions, technical requirements, test Test methods, inspection rules. This section applies to the next GB/T 14092.6 specified environmental conditions general purpose machinery used in industrial products. Product categories include. Mining machinery, lifting machinery, processing machinery, transport machinery, drilling machines, mining electrical equipment.

2 Normative references

The following documents contain provisions which, through

GB/T 14093 reference in this text, constitute provisions of this part. For dated reference documents Member, all subsequent amendments (not including errata content) or revisions do not apply to this section, however, encouraged to reach under this section Parties to research agreement to use the latest versions of these documents. For undated reference documents, the latest versions apply to this section.
