What this standard covers

This standard specifies the two sampling methods of chemical short fibers. Product under which sampling method is suitable for the production of plant quality inspection, package sampling method is suitable for delivery, arbitration inspection and reinspection. This standard applies to the production of organic synthetic polymers or natural polymers into production, but also by the production of bulk inorganic fibers, tow and tops of sampling. For example: polyester, acrylic, nylon, polypropylene, vinylon, viscose, Modal, Lesell, acetic acid and carbon fibers.

Document data

International classification (ICS): 59.060.01.

Chinese classification (CCS): W50.

Estimated length of the Chinese original: 10,134 words.

Adopted international standard: BISFA ZBH 34-1998, NEQ; BISFA ZBH 35-2004, NEQ.

Supersedes the earlier edition GB/T 14334-1993.
