What this standard covers

This standard specifies the criteria for noise emission values ??of machinery and equipment by one mark, namely, the production of noise emission values ??of each machine has its own mark, respectively. Also the noise emission values ??of a single test equipment meets a way that signs values. This standard applies to determine and verify the value of small-batch and single-sign pieces individually marked production of machinery and equipment. Does not apply to signs for determining and verifying the value of large quantities of machinery and equipment.

Document data

International classification (ICS): 17.140.20.

Chinese classification (CCS): A42.

Estimated length of the Chinese original: 3,323 words.

Adopted international standard: ISO 7574-2-1985, NEQ.
