Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009. This standard replaces GB/T 14629.1-1993 "Small Lake Sheepskin". Compared with GB/T 14629.1-1993 "Small Lake Sheepskin", the main technical changes are as follows:

- Modified the standard name;
- Removed generic terms (see Chapter 2 of the.1993 edition);
- Removed the grade ratio difference (see 3.2 of the.1993 edition);
- Revised inspection rules (see Chapter 5, Chapter 5 of the.1993 edition);
- Simplified packaging, transportation, storage (see Chapter 6, Chapter 6 of the.1993 edition). This standard was proposed by the China Light Industry Association. This standard is under the jurisdiction of the National Leather Industry Standardization Technical Committee (SAC/TC252). This standard was drafted. Tongxiang Xianren Fur Co., Ltd., Jiaying City Fur and Footwear Industry Research Institute, Tongxiang Xinnuo Fur Co., Ltd. Company, China Leather and Footwear Industry Research Institute, Jiaying College. The main drafters of this standard. Yuan Xuzheng, Jiang Sujie, Xu Jianqing, Shen Guoqing, Yu Mingfeng, Zhao Liguang, Shen Bing, Bu Qiaoqiao. The previous versions of the standards replaced by this standard are.
- GB/T 14629.1-1993. Small lake sheepskin

1 Scope

GB/T 14629.1-2018 is the Chinese national standard on huyang lamb skin, in the field of textile and leather technology. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 28 December 2018 by the State Administration for Market Regulation; Standardization

Administration of China, and has been in force since 1 July 2019. Classification: ICS 59.140.20, CCS Y46. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the terms and definitions, requirements, inspection methods, inspection rules, packaging, transportation and storage of Xiaohu sheepskin. This standard applies to raw small lake sheepskin that has not been treated after slaughter or has been properly preserved.

2 Terms and definitions

The following terms and definitions apply to this document.

2.1 Huyang yang Originally produced in the Taihu Lake Basin of China, mainly distributed in Jiaxing City, Zhejiang Province, Huzhou City, Hangzhou City, Suzhou City, Jiangsu Province and Shanghai In some areas. It is a short-lived sheep, a white lamb skin sheep breed.

2.2 The peeled skin of the newborn lamb produced by the purebred sheep is not more than 2700 cm².

2.3 Wave curl wavepattern The pattern is closely arranged by bending into "S"-shaped wool fibers, and the matte surface is undulating.

2.4 Slice pattern The pattern is irregularly arranged, and the composition is shaped like a cloud pattern.

3.1 Initial processing requirements

3.1.1 The slaughtering and stripping is appropriate, the skin shape is intact, and the wool and board are clean and dry.

3.1.2 The shape of the processing is a natural board.

3.2 Skin area The area of the leather board should meet the requirements of Table 1. Table

1 The area of the skin area is square centimeters Skin type cortical area measurement method Large piece of skin 1780~2700 Small piece of skin < 1780 According to the salt wet skin, other storage methods are adjusted appropriately.
