Foreword

Rules in this section in accordance with GB/T 1.1-2009 given draft.

This section identical with IEC 60050-714:1992 "International Electrotechnical Vocabulary of switching and signaling telecommunications." the term of this section and item number IEC 60050-714:1992 consistent.

This Part replaces GB/T 14733.4-1993 "Terminology for telecommunications switching technology." Compared to major changes in this part of GB/T 14733.4-1993 as follows.

--- The standard new two terms. 714-18-08 interface circuit, 714-18-11 bus.

1 Scope

This section GB/T 14733 regulations concerning telecommunications switching and signaling aspects of the terms and their definitions.

This section applies to telecommunications technology.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated edition applies to this article Member. For undated references, the latest edition (including any amendments) applies to this document.

GB/T 2900.68-2005 Electrotechnical terminology telecommunication network, telecommunication services and run (IEC 60050-715:1996, IDT) GB/T 14733.11-2008 term telecommunications transmission (IEC 60050-704:1993, IDT)

3.1 General terms

714-01-01

Communication Information in accordance with the transfer agreements have been reached.

714-01-02

Telecom telecommunication

- 1) communicate via a wired, wireless, optical or other electromagnetic systems of.
- 2) through any wired, wireless, optical or other electromagnetic systems of signs, signals, authentic images, sounds or information of any nature carried out Ho transmission, emission or reception.

714-01-03

Call (telecommunications) conversation (intelecommunication) the exchange of information between terminals.

Note: This term is used to indicate the use of specially-end constant communication connection or

virtual connection to achieve.

714-01-04

Busy busycondition

Busy occupation

Telecommunication services carrying device is being used or after receiving a service request in reserve status.

714-01-05

[Transmission] channel (transmission) channel [Transmission] path A means of unidirectional transmission of signals between two points.

[GB/T 14733.11-2008,704-04-02]

NOTE: Several channels may share a common channel for example to each channel assigned a particular frequency band or a particular time slot.
