1 Scope

GB/T 14788-2018 is the Chinese national standard on raw nyctereutes procyonoides skin, in the field of textile and leather technology. The /T suffix marks it as a recommended

standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 28 December 2018 by the State Administration for Market Regulation; Standardization Administration of China, and has been in force since 1 July 2019. Classification: ICS 59.140.20, CCS Y46. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the terms and definitions, classification, requirements, inspection methods, inspection rules, packaging, transportation and storage of suede. This standard applies to raw hides that have not been treated or have been properly preserved after slaughter.
