1 Scope

GB/T 14946.2-2019 is the Chinese national standard on information for national organization, cadre and personnel management - part 2: information classification and code lists, in the field of information technology. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 30 August 2019 by the State Administration for Market Regulation; Standardization Administration of China, and has been in force since 1 March 2020.

Classification: ICS 35.040, CCS A24. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This part of GB/T 14946 specifies the code tables used by national organizations, cadres (including civil servants) and personnel management information. Code classification and coding principles, code table attributes, code management and registration. This section applies to the design, development and information systems of information systems for national organizations, cadres (including civil servants) and personnel management.
