What this standard covers

This standard specifies the terms of ordinary woodworking lathe (hereinafter referred to as the machine) of each part. While referring to GB/T 17421. 1-1998, provides for inspection of geometric precision machine tools, and given the appropriate tolerances for general purposes, ordinary precision machine tools. This standard specifies only the geometric accuracy test machine, not for running test machine (such as vibration, unusual noise, reptiles and other test components), does not apply to machine characteristics test (such as speed, feed rate, etc.) these tests are generally advised to geometric precision in front of the machine -test. This standard for precision machine work without mandatory testing, which should be between the user and the manufacturer prior agreements separately.

Document data

International classification (ICS): 79.120.10.

Chinese classification (CCS): J65.

Estimated length of the Chinese original: 13,141 words.

Adopted international standard: ISO 7987-1985, IDT.

Supersedes the earlier edition GB/T 15376-1994.
