What this standard covers

This standard applies to electronic equipment Fixed film resistor networks. This standard specifies the standard terminology Fixed film resistor networks qualification approval and capability approval by the specification and use of detailed specifications, test procedures and test methods. Fixed film resistor networks can be classified according to the structure and manufacturing process.

Document data

International classification (ICS): 31.04.

Chinese classification (CCS): L13.

Estimated length of the Chinese original: 25,243 words.

Adopted international standard: IEC 61045-1-1991, IDT.
