Foreword

GB/T 15721 "prosthetics and orthotics - Limb deficiencies" by the following six components.

- Part 1. congenital limb deficiencies described method
 - Part 2. Method of describing lower limb amputation stumps
 - Part 3. Method of describing upper limb amputation stumps
 - Part 4. description of the cause of amputation
 - Part 5. description of the clinical symptoms of amputees
 - Part 6. patients with prosthetic required under the circumstances described this section
- GB/T 15721 Part 5.

This part identical with ISO 8548-5:2003 "prosthetics and orthotics - Limb deficiencies - Part 5. description of the clinical symptoms of amputees" (In English).

This section proposed by the People's Republic of China Ministry of Civil Affairs.

This part of the National Rehabilitation and special equipment Standardization Technical Committee on Persons with Disabilities (SAC/TC148) centralized.

This part of the main drafting units. China Rehabilitation Research Center, National Rehabilitation Devices Quality Supervision and Inspection Center, Beijing orthopedic technology center.

Introduction

Results amputee rehabilitation is not limited to amputation surgery itself, but also involves the installation of prostheses, and also about the causes of amputation, Also it depends on the patient and the physical presence of other disabilities. Clinicians in different countries to use their own terminology to meet their needs.

Therefore, it is necessary to establish an international system in order to harmonize applied to different patients and different publications. The relevant members, including the surgeon Students, other physicians (especially related to doctors and rehabilitation), physical therapists, occupational therapists and prosthetists, the application of this standardized system Causes and basic information on the patient's description of amputation, its epidemiologists and health administrators also have value.

Planned system needs to meet the different members of the clinical reasons for amputation can describe, easy to make records integration. GB/T 15721 in this section it defines the most basic information and be described. These tables contain information designed by the agencies, should be practicable, and amputations in points Analysis may be appropriate changes.

GB/T 15721.5-2008/ISO 8548-5:2003 Prosthetics and orthotics - Limb deficiencies Part 5. description of the clinical symptoms of amputees

1 Scope

This section GB/T 15721 to determine the influence of factors described amputee rehabilitation methods.

2 Normative references

The following documents contain provisions which, through reference GB/T 15721 in this section constitute provisions of this section. For dated reference documents Member, all subsequent amendments (not including errata content) or revisions do not apply to this section, however, encouraged to reach under this section Parties to research agreement to use the latest versions of these documents. For undated reference documents, the latest versions apply to this section.

GB/T 15721.1 prosthetics and orthotics - Limb deficiencies - Part 1. congenital limb deficiencies described method (GB/T 15721.1-1995, idt ISO 8548-1:1993) GB/T 15721.2 prosthetics and orthotics - Limb deficiencies - Part 2. Method of describing lower limb amputation stumps (GB/T 15721.2-1995, idt ISO 8548-2:1993) GB/T 15721.3 prosthetics and orthotics - Limb deficiencies - Part 3. Method of describing upper limb amputation stumps (GB/T 15721.3-1995, idt ISO 8548-3:1993) GB/T 15721.4 prosthetics and orthotics - Limb deficiencies - Part 4. amputation description of the cause (GB/T 15721.4-2008, ISO

8548-4:1998, IDT) Basic terms vitro prostheses and external orthoses. ISO 8549-1
Prosthetics and orthotics academic language - Part 1 ISO 8549-2 Prosthetics and orthotics
academic language - Part 2. For in vitro prostheses and prosthetic user terms

3 Terms and Definitions

GB/T 15721.1, GB/T 15721.2, GB/T 15721.3, GB/T 15721.4, ISO 8549-1 and ISO 8549-2
in surgery Terms and definitions apply to this section.

4.1 Overview

4.2 to 4.5 The following describes the situation of amputees.

4.2 Personal circumstances

Age, sex, height, weight and so on.

Description of relevant personal social activities and natural environmental, occupational
and recreational activities.

Description of important and relevant medical history, including smoking habit.

Description amputation before the upper and lower limbs or trunk function limited
circumstances which affect the outcome of rehabilitation of patients.

4.3.1 Stump

Case method GB/T 15721.2 or GB/T 15721.3 described in detail to describe the stump, if
the stump is Lee limb (common A) it should be described.

GB/T 15721.5-2008/ISO 8548-5:2003
