What this standard covers

This standard specifies the irrigation with polyethylene (PE) pipe fittings caused by the plug-in environmental stress cracking susceptibility test methods and technical requirements. This standard applies to use plug-in irrigation pipe with polyethylene (PE) susceptibility test methods to environmental stress cracking pressure pipes.

Document data

International classification (ICS): 83.140.30.

Chinese classification (CCS): G33.

Estimated length of the Chinese original: 6,652 words.

Adopted international standard: ISO 8796-2004, MOD.

Supersedes the earlier edition GB/T 15819-1995.
