What this standard covers

This standard specifies a single or multiple B-channels (64kbit/s) or H0 channel (384kbit/s), or a single H11 channel (1536kbit/s) or H12 channel (1920kbit/s) transfer audiovisual teleservices on the frame structure. This standard applies to the 64 to 1920kbit/s for a total transmission rate channel dynamically partitioned into multiple low-rate suited for audio, video, data and telematics business subchannel transmission applications.
