1 Scope

GB/T 16180-2014 is the Chinese national standard on standard for identify work ability - gradation of disability caused by work-related injuries and occupational diseases, in the field of health care technology. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 3 September 2014 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 January 2015. Classification: ICS 11.020, CCS C60. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the work-related injury and occupational disability workers the ability to work to identify the principles and grading standards. This standard applies to workers due to work related injury and occupational disability degree of identification in professional activities.
