6 String preparation

Definition 7 matching rules

Part IV Context

8 Context type definition

Appendix A (normative) with ASN. 1 Selected attribute types described in

Annex B (informative) Summary of the property type

Foreword

GB/T 16264 "Information technology - OSI Directory", comprising 10 sections.

Part 1. concepts, models and services overview;

Part 2. Model;

Part 3. Abstract service definition;

Part 4. Procedures for distributed operation;

Part 5. Protocol specification;

Part 6. Selected attribute types;

Part 7. Selected object classes;

Part 8. a public key and attribute certificate frameworks;

Part 9. Copy (to be published);

Part 10. System Management uses common directory management mechanism (to be

released).

This part of GB/T 16264 Part 6.

This part identical with ISO/IEC 9594-6:2005 "Information technology - OSI Directory. Selected attribute types", only Editorial changes.

This Part replaces GB/T 16264.6-1996.

This portion of the GB/T 16264.6-1996 difference is.

--- Increasing the matching rules;

--- Adds context.

Appendix A of this section is normative appendix, Appendix B, Appendix C, Appendix D and Appendix E are informative appendices.

This section proposed by the People's Republic of China Ministry of Information Industry.

This part of the National Information Technology Standardization Technical Committee centralized.

1 Scope

GB/T 16264 This section defines the various directories are useful in several applications attribute types and matching rules.

Attribute types and matching rules can be divided into three categories, as follows.

Some attribute types and matching rules can be used for various applications, or the directory itself to identify and/or use them.

Note: in a suitable application, it is recommended before generating a new property type, property type or priority matching rules defined in this section.

Some attribute types and matching rules in the international arena have been standardized, but is a particular application. These attribute types and matching rules.

It is defined in the standards relating to the application and involved in.

Any regulatory agency for any purpose specified own attribute types and matching rules. They are not standardized internationally if the record Built outside their institution regulatory agencies want to use them, it can only be used through bilateral consultations.

2 Normative references

The following documents contain provisions which, through reference GB/T 16264 in this section constitute provisions of this section. For dated reference documents Member, all subsequent amendments (not including errata content) or revisions do not apply to this

section, however, encouraged to reach under this section Parties to research agreement to use the latest versions of these documents. For undated reference documents, the latest versions apply to this section.
