What this standard covers

This standard specifies test methods for the quantitative test adhesion force between two layers of plastic film. This standard applies to test a variety of plastic resin material between two layers of thin films with different processing conditions for the preparation process or the presence of blocking force. Plastic film layer thickness between 0.025 ~ 0.10mm.

Document data

International classification (ICS): 83.14.

Chinese classification (CCS): G31.

Estimated length of the Chinese original: 6,610 words.

Adopted international standard: ASTM D1893-1967 (1985), NEQ.
