What this standard covers

This standard specifies the requirements funnel outflow from loose material (powder or pellets) performance measurement method density. When this standard is applied fairly thick material, the upper part of the cylinder due ruler Calibrating error will be introduced when the extra samples, so the test results may generate errors. If the density molded plastic molding under similar conditions, the performance of the relative density relative volume molding loose or evaluate a certain value.

Document data

International classification (ICS): 83.080.10.

Chinese classification (CCS): G31.

Estimated length of the Chinese original: 6,648 words.

Adopted international standard: iso 60-1977, MOD.

Supersedes the earlier edition GB/T 1636-1979.
