

ICS 13.16
CCS A 25

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 16440-1996

**Vibration and shock. Mechanical driving point impedance of the
human body
(English Translation)**

Issued on: June 17, 1996

Implemented on: December 1, 1996

Issued by: State Bureau of Technical Supervision

What this standard covers

This standard specifies the supine body's mechanical driving point impedance sitting, standing mechanical driving point impedance of the human body and the role of the x-axis vibration under z under the action of axial vibration. This standard applies to the frequency range of 0.5 ~ 31.5 Hz under the action of the axial vibration, sitting, standing and supine mechanical driving point impedance of the human body, as a designer - systems and devices and evaluate their mechanical properties and vibration control measures taken basis.

Document data

International classification (ICS): 13.16.

Chinese classification (CCS): A25.

Estimated length of the Chinese original: 8,837 words.

Adopted international standard: ISO 5982-1981, NEQ.
