What this standard covers

This standard applies to the definition of weld joints, specifies the general requirements for fusion splice fiber optic cable and a minimum quality assessment procedures. These quality assessment procedures designed to protect the parts of the joint assessment of the inherent capacity of the terminal to avoid performance degradation and protection against external influences fiber connectors capability. This standard does not include fusion splicer performance requirements. All dimensions and optical properties of fusion splice requirements to be specified in the applicable detail specification. This standard includes single fiber fusion splice and multi-fiber fusion splice Blank detail specification.

Document data

International classification (ICS): 33.180.10.

Chinese classification (CCS): M33;L23.

Estimated length of the Chinese original: 25,280 words.

Adopted international standard: IEC 61073-3-1993, IDT.
