What this standard covers

This standard specifies the method for the preparation of PVC paste with a disperser. The prepared paste can be used to characterize the rheological properties of the respective PVC. As can establish consistency between the different products methods. The method may also contain other components useful for the preparation (e. g., a stabilizer) in the paste, but this is not named for the resin paste.

Document data

International classification (ICS): 83.080.20.

Chinese classification (CCS): G32.

Estimated length of the Chinese original: 6,611 words.

Adopted international standard: ISO 11468-1997, IDT.

Supersedes the earlier edition GB/T 16613-1996.
