What this standard covers

This standard specifies the qualitative and quantitative analysis using high performance liquid chromatography and purification refined general rules. This standard applies to the use of high performance liquid chromatography, inorganic, qualitative and quantitative analysis of organic compounds and refined purification, as well as general requirements for the determination of the molecular weight of the polymer compound.

Document data

International classification (ICS): 71.040.40; 71.040.50.

Chinese classification (CCS): G04.

Estimated length of the Chinese original: 27,269 words.

Adopted international standard: JIS K0124-2002, MOD.

Supersedes the earlier edition GB/T 16631-1996.
