What this standard covers

This standard specifies for GB/T 16656 Application Protocol (AP) to achieve consistency side of the abstract side test test method. Its scope limited to the following object method: declare generated GB/T 16656 4 type instance preprocessor. The model is based on examples of GB/T 16656. 21-1997 defined switching fabric to express. Statement to accept and process GB/T 16656 mode instance postprocessors. The model instance is based GB/T 16656. 21-1997 switch fabric defined to express, Statement generate GB/T 16656 9 mode instance SDAI interfaces preprocessor. It uses the ISO 10303-22, 1998 SDAI interfaces defined instances generated with these models SDAI implementation, declare their acceptance of GB/T 16656 1143t case of SDAI interfaces postprocessors. It uses the ISO 10303-22: 1998 SDAI interfaces defined patterns extracted from SDAI implementation examples. The following belong to GB/T 16656 scope of this part

Document data

International classification (ICS): 35.240.50.

Chinese classification (CCS): L67.

Estimated length of the Chinese original: 18,124 words.

Adopted international standard: ISO 10303-34-2001, IDT.
