

ICS 17.240
CCS A 58

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 16841-2008

Replacing GB/T 16841-1997

**Guide for dosimetry in an electron beam facility for radiation
processing at energies between 300 keV and 25 MeV**

能量为 300 keV~25 MeV 电子束辐射加工装置剂量学导则

(English Translation)

Issued on: September 19, 2008

Implemented on: August 1, 2009

Issued by: Standardization Administration of China

What this standard covers

This standard specifies the electron beam radiation processing in order to ensure all products to produce the desired effects of radiation received by the dose required, confirm the installation, operation confirmation, performance qualification (IQ, OQ and PQ) and daily doses that are involved in processing of measurement procedures, as well as the possible impact of these processes and products in the absorbed dose to monitor other programs.

Document data

International classification (ICS): 17.240.

Chinese classification (CCS): A58.

Estimated length of the Chinese original: 42,462 words.

Adopted international standard: ISOASTM 51649-2005, IDT.

Supersedes the earlier edition GB/T 16841-1997.
