**NATIONAL STANDARD OF THE  
PEOPLE'S REPUBLIC OF CHINA**

**GB/T 16895.21-2020**

Replacing GB/T 16895.21-2011

---

**Low-voltage electrical installations - Part 4-41: Protection for  
safety. Protection against electric shock**

低压电气装置 第4-41部分：安全防护 电击防护

**(English Translation)**

**Issued on: December 14, 2020**

**Implemented on: July 1, 2021**

---

**Issued by: State Administration for Market Regulation, China National  
Standardization Administration**

## Table of Contents

- 1 Scope
- 3 General requirements
  - 3.1 Unless otherwise specified, the voltages in this section refer to the following voltages.
  - 3.2 Protective measures should include.
  - 3.6 The protective measures specified in Appendix C are.
  - 3.9 The following parts may not adopt the fail-safe provisions.
- 4 Protection measures. automatically cut off the power
  - 4.1 General
  - 4.2 Requirements for basic protection
  - 4.3 Requirements for fault protection
    - 4.3.1 Protective earthing and protective equipotential bonding
      - 4.3.1.1 Protective earthing
      - 4.3.1.2 Protective equipotential bonding
    - 4.3.2 Automatic power cut-off in case of fault
    - 4.3.3 Power supply requirements for socket outlets and outdoor portable equipment
    - 4.3.4 Additional requirements for luminaire circuits in TN and TT systems
  - 4.4 TN system
  - 4.5 TT system
    - 4.5.4 When over-current protective devices are used, formula (2) shall be satisfied.
  - 4.6 IT system
    - 4.6.2 The exposed conductive parts should be grounded individually, in groups or collectively.
    - 4.6.3 The IT system can use the following monitors and protective devices.
  - 4.7 Functional Extra Low Voltage (FELV)
    - 4.7.1 General
    - 4.7.2 Requirements for basic protection
    - 4.7.3 Requirements for failsafe
    - 4.7.4 Power supply
    - 4.7.5 Plugs and sockets
