What this standard covers

This standard specifies the method for measuring agricultural and forestry tractors and machinery noise at the operator's position. This standard applies to the operator to manipulate riding or walking tractors and mechanical manipulation, only mechanical noise measurement itself. This standard specifies the test procedures and GB/T 14259 in the same simple method of testing procedures. The standard also specifies the basic requirements for agricultural and forestry tractors and machinery operator position noise measurement and recording.

Document data

International classification (ICS): 17.14.

Chinese classification (CCS): Z32.

Estimated length of the Chinese original: 13,123 words.

Adopted international standard: ISO 5131-1996, MOD.
