What this standard covers

This standard specifies test methods for the thermal stability of the common comparison with standard samples to compare pigment. This standard also applies to the determination of the heat resistance of the pigment. When this method is not applicable to a particular generic product should require a special method to compare their thermal stability.

Document data

International classification (ICS): 87.060.10.

Chinese classification (CCS): G53.

Estimated length of the Chinese original: 2,267 words.

Adopted international standard: ISO 787-21-1979, MOD.

Supersedes the earlier edition GB 1711-1979.
