What this standard covers

This standard specifies the environmental and climatic conditions, such as air temperature, humidity and atmospheric pressure. This standard does not consider the climatic conditions during maintenance. This standard does not consider environmental conditions directly related to fire and explosion hazards and environmental conditions related to ionizing radiation. Impact of specific environmental conditions of personnel does not belong to the scope of this standard to consider. Consider the impact of the standard amount is limited to the amount that may have a direct impact on the performance of process measurement and control devices, and therefore only consider environmental conditions relating thereto. The standard list of environmental conditions in order given to severity levels or groups of severity level indicates the place level.

Document data

International classification (ICS): 25.040.01.

Chinese classification (CCS): N10.

Estimated length of the Chinese original: 26,281 words.

Adopted international standard: IEC 60654-1-1993, IDT.

Supersedes the earlier edition ZBY 120-1983.
