What this standard covers

This standard specifies the use of coated -1, -4 Tu and methods falling ball viscometer viscometer paint viscosity. The criteria used painted -1 viscometer for the determination of time of not less than 20s out of the paint products; Tu -4 viscometer for the determination of flow time in the 150s following coatings; falling ball viscometer suitable for measuring high viscosity transparent paint products. This standard also applies to the determination of the viscosity of semi-finished products like paints and other related products.

Document data

International classification (ICS): 87.04.

Chinese classification (CCS): G50.

Estimated length of the Chinese original: 7,727 words.

Supersedes the earlier edition GB 1723-1979.
