

ICS 33.14
CCS L 86

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 17311-1998

**Standard volume indicators
(English Translation)**

Issued on: April 10, 1998

Implemented on: December 1, 1998

Issued by: State Quality and Technical Supervision

What this standard covers

This standard specifies the requirements characteristics, performance requirements and the corresponding measurement methods electromechanical volume table. The concept of "volume" is - used to determine the parameters of the language and practical measure of the intensity of the music program signals. Because the program is rapidly changing the voltage swing response volume table, the table itself depends largely on the volume of dynamic characteristics, therefore, the standard includes specifications for these characteristics. The term "vu" is used to indicate the volume, uv program number indicates the volume of predetermined value higher or lower than the reference level. This standard does not involve peak program level meter, because it is GB/T 17182-1997 "peak program level meter" content.

Document data

International classification (ICS): 33.14.

Chinese classification (CCS): L86.

Estimated length of the Chinese original: 9,923 words.

Adopted international standard: IEC 60268-17-1990, IDT.
