Foreword

GB/T 17498.6-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 31 March 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 October 2027.

This edition replaces GB 17498.6-2008.

The document adopts an international standard (ISO or IEC).

It is under the responsibility of the China National Light Industry Council.

Classification: ICS 97.220.30; CCS Y55.

1 Scope

Treadmills are among the most widely used pieces of fitness equipment, and this standard, Part 6 of the series on indoor stationary training equipment, gives additional specific safety requirements and test methods for them. It is intended to be read together with the general part of the series, and it is a recommended national standard.

Treadmill manufacturers, exporters and importers, gym operators who source equipment, safety test laboratories and product designers are the intended audience. Certification and quality teams will use it when planning conformity assessment work.

The document was issued on 31 March 2026 and takes effect on 1 October 2027, which leaves a long transition period. It replaces GB 17498.6-2008, which carried a different designation, so suppliers should note that the reference changes along with the content when updating their documentation.
