What this standard covers

This standard defines the integrated circuit cards with contacts and related interface devices characteristics of the test method and GB/T 16649 to adapt the definition given for each test method cross- reference one or more base standards, these basic criteria may be GB/T 14916, it can be applied to one or more definitions of the card application in the identification information storage technology complementary standards. This section defines only the IC cards with contacts and related interface devices characteristics of the test method, GB/T 17554. 1 is defined as one or more card technologies testing methods that are shared by the other part defines the various special technical testing methods.

Document data

International classification (ICS): 35.240.15.

Chinese classification (CCS): L64.

Estimated length of the Chinese original: 52,568 words.

Adopted international standard: ISO/IEC 10373-3-2001, MOD.
