CCS W 59

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 17637-1998

**Geotextiles and geotextile-related products. Determination of
the tensile creep and creep rupture behaviour
(English Translation)**

Issued on: December 24, 1998

Implemented on: March 1, 1999

Issued by: State Quality and Technical Supervision

What this standard covers

This standard specifies the determination of tensile creep of geotextiles and related products and methods of tensile creep rupture properties. This standard applies to the scope limited to: due to its premature destruction or due to the impact of the base creep strengthening the role of the structure which may cause structural collapse products. Because the test is time-consuming and complex procedures, therefore not recommended as a routine quality control test.

Document data

International classification (ICS): 59.080.70.

Chinese classification (CCS): W59.

Estimated length of the Chinese original: 14,163 words.

Adopted international standard: ISO/FDIS 13413-1998, MOD; ISO 10319-1993, NEQ.
