What this standard covers

This standard specifies the requirements for the LAN with a coaxial cable. The purpose of this standard is to provide local area network using coaxial cable recommended ratings and characteristics and specifications selected from the total applicable quality assessment procedures, tests and test methods, and gives the general performance requirements and additional test methods. Corresponding with the standards set forth in the detailed specification of test severities and requirements should be equivalent to or better than the standard level of performance. When the GB/T 17737. 1-1999 standard requirements and the requirements of this conflict, priority should adopt this standard.

Document data

International classification (ICS): 33.120.10.

Chinese classification (CCS): L26.

Estimated length of the Chinese original: 13,131 words.

Adopted international standard: IEC 61196-3-1998, IDT.
