What this standard covers

This standard specifies the administration, commerce and transport between trading partners in electronic data interchange (EDI) as used in the delivery schedule packets (DELFOR) definition. The message sent by the buyer to the supplier, according to the terms of agreement or purchase order, delivery instructions are given on the short-term and/or for planning medium to long term product/service forecast. About this newspaper article can be used for labor and raw material resources for instructions. This standard applies to domestic and international trade. It is based on a common business practice, not limited to a particular type of business or industry.
