What this standard covers

This standard specifies the use of international coding scheme identifier (ICSI) as an information exchange with the coding scheme identifies the general structure. Application of the coding scheme generated by the code value and the corresponding value with ICSI can give a clear meaning. This standard does not require ICSI values ??and code value associated with the mechanism, so it has nothing to do exchange syntax used in the data elements users has broad applicability. Coding schemes and exchange their own coding scheme in the technical implementation of the norms, such as internal procedures, file organization techniques, storage media, coding rules, language, etc. are not specified in this standard.

Document data

International classification (ICS): 35.040.

Chinese classification (CCS): L71.

Estimated length of the Chinese original: 8,879 words.

Adopted international standard: ISO/IEC 7826-1-1994, IDT.
