What this standard covers

This standard specifies the 130mm with 1G byte capacity optical disk cartridge (ODC) features. This standard defines two classes of related but distinct from the optical disk cartridge: R/W type the entire recording surface of the disc using thermal magnetic effect and magneto-optical effect write, read and erase data multiple times. W/O type the entire surface of the disc using thermal magnetic effect and magneto-optical effect write once, read data. This standard specifies the exchange between the optical disc drive. This standard with a Volume and file structure on the standard provides a data processing system with full data exchange between. Exchange will not cause any errors related to the write, read, erase capability.

Document data

International classification (ICS): 35.220.30.

Chinese classification (CCS): L64.

Estimated length of the Chinese original: 69,627 words.

Adopted international standard: ISO/IEC 13481-1993, IDT.
