NATIONAL STANDARD OF THE

PEOPLE'S REPUBLIC OF CHINA

GB/T 1819.6-2026

Replacing GB/T 1819.6-2004

Methods for chemical analysis of tin concentrates-Part 6: Determination of antimony and mercury contents-Atomic fluorescence spectrometry

锡精矿化学分析方法 第6部分：锑和汞含量的测定 原子荧光光谱法

1 Foreword

GB/T 1819.6-2026 was issued by State Administration for Market Regulation; Standardization Administration of China on 30 October 2026 and takes effect on 1 May 2027.

It replaces the earlier edition GB/T 1819.6-2004.

It is one of 32 parts of the GB/T 1819 series.

2 Scope Preview

GB/T 1819.6-2026 carries no ICS number and no Chinese Standard Classification code.

This catalogue holds 76,457 other GB/T standards.

Of the 47,415 GB/T standards that do carry an ICS number, 3,437 (7%) fall under ICS 77, in the field of metallurgy.

3 About this standard

Issued by: State Administration for Market Regulation; Standardization Administration of China

GB/T 1819.1-2022 - Methods for chemical analysis of tin concentrates-Part 1: Determination of moisture content-Heat drying method

GB/T 1819.2-2004 - Methods for chemical analysis of tin concentrates--Determination of tin content--The potassium iodate titrimetric method

GB/T 1819.2-2026 - Methods for chemical analysis of tin concentrates - Part 2: Determination of tin content - Potassium iodate titration method

GB/T 1819.3-2004 - Methods for chemical analysis of tin concentrates--Determination of iron content--The cerium sulfate titrimetric method

GB/T 1819.4-2004 - Methodsfor chemical analysis of tin concentrates--Determination of lead content--Flameatomic absorption spectrometric method and EDTA titrimetric method

GB/T 1819.5-2004 - Methods for chemical analysis of tin concentrates--Determination of arsenic content--The molybdoantimonyarsenate blue spectrophotometric method and the distillation-iodimetric titrimetric method

GB/T 1819.7-2004 - Methods for chemical analysis of tin concentrates - Determination of bismuth content - Flame atomic absorption spectrometric method

GB/T 1819.7-2017 - Methods for chemical analysis of tin concentrates - Part 7:Determination of bismuth content - Flame atomic absorption spectrometric method

GB/T 1819.7-2026 - Methods for chemical analysis of tin concentrates - Part 7: Determination of antimony, bismuth, zinc, copper and silver contents - Flame atomic absorption spectrometry

GB/T 1819.8-2004 - Methods for chemical analysis of tin concentrates - Determination of zinc content - Flame atomic absorption spectrometric method

GB/T 1819.8-2017 - Methods for chemical analysis of tin concentrates - Part 8: Determination of zinc content - Flame atomic absorption spectrometric method

GB/T 1819.9-2004 - Methods for chemical analysis of tin concentrates - Determination of tungsten trioxide content - The thiocyanate spectrophotometric method

GB/T 1819.9-2017 - Methods for chemical analysis of tin concentrates-Part 9: Determination of tungsten trioxide content-The thiocyanate spectrophotometric method

GB/T 1819.10-2004 - Methods for chemical analysis of tin concentrates - Determination of sulphur content - The high frequency infrared absorption method and the combustion potassium iodate titrimetric method

GB/T 1819.10-2017 - Methods for chemical analysis of tin concentrates-Part 10: Determination of sulfur content-High frequency combustion with infrared absorption method and potassium iodate titrimetric method
