What this standard covers

This standard applies to a range of environmental testing procedures and measuring procedures, and gives some occasions to assess Fibre optic interconnecting devices and passive components in anticipation of working conditions and the ability to set priorities severities. GB/T18309 series of standards applied in addition to the range, but also for other areas of need. The purpose of this standard is environmental testing procedures and measuring program provides uniformity and reproducibility of these procedures for the drafting of fiber optic interconnecting devices and passive components specification is necessary.

Document data

International classification (ICS): 33.180.20.

Chinese classification (CCS): L50.

Estimated length of the Chinese original: 12,199 words.

Adopted international standard: IEC 61300-1-1995, IDT.
