What this standard covers

This standard specifies the observation at a given constant temperature during high humidity effects. Moisture may cause expansion of the fiber optic device function deterioration occurs, causing mechanical strength and other important mechanical properties change, and optical performance may be reduced. Although this procedure may not be able to simulate tropical environment testing, but can be used to determine the insulation or coating material moisture absorption properties.

Document data

International classification (ICS): 33.180.20.

Chinese classification (CCS): L50.

Estimated length of the Chinese original: 5,590 words.

Adopted international standard: IEC 61300-2-19-1995, IDT.
