Zhifu, Wu Xuejun, Zhu Hongwei, Wei Xiaoying, Gong Baoli. This standard replaces the standards previously issued as.

--- GB 18417-2001, GB/T 18417-2009. Household health insecticide electric mosquito coils

1 Scope

GB/T 18417-2017 is the Chinese national standard on domestic sanitary insecticide - electrothermal vaporizing mats, in the field of agriculture. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 29 December 2017 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 April 2018.

Classification: ICS 65.100.10, CCS G25. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the terms and definitions, requirements, test methods, inspection rules and signs, household appliances Loading, transportation, storage, use instructions. This standard applies to the absorbable material as a carrier, add insecticidal active ingredients made as a drive (off) mosquito tablets, and the constant temperature electricity Supporting the use of heaters, the rated heating temperature, the active ingredient in the role of gas in the mosquito, play a drive (off) mosquito effect of the product.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version applies to this article Pieces. For undated references, the latest edition (including all amendments) applies to this document.

GB/T 2828.1-2012 Sampling procedures for inspection - Part 1 - Batch-by-lot inspection by acceptance quality limit (AQL) plan

GB/T 2829-2002 periodic inspection sampling procedures and tables (for the stability of the test process)

GB 24330 Home Hygienic insecticide products safety common technical conditions

3 Terms and definitions

The following terms and definitions apply to this document.

3.1 Vaporization rate vaporizationrate Vr active ingredients The ratio of active ingredient to expressible active ingredient in the first half of the express hold-up period.

4 Requirements

4.1 Active ingredient requirements, toxicology, active ingredient content and allowed fluctuation range, efficacy, heat storage stability should be consistent with GB 24330 Provisions.

4.2 Appearance and Sensory

4.2.1 Appearance Products should be indicative color, uniform color, not mildewed.

4.2.2 Sensory The same product may be odorless or a variety of scent, the scent should be consistent with the explicit scent, no smell.
