What this standard covers

This standard specifies the layers in the CAD file organization structure of general principles. Layers CAD files for visibility, and control data management and exchange of data, used to express its structure. This standard applies these principles in the preparation and use of computer systems in all aspects of technical documentation, although these principles is a matter of principle to the user, but the expectation CAD ??system developers can implement and support this part of the contents of this standard software tools. In addition, another important purpose of these principles is to guide children in third-party developers how to construct a data repository.

Document data

International classification (ICS): 01.110.20.

Chinese classification (CCS): J04.

Estimated length of the Chinese original: 6,611 words.

Adopted international standard: ISO 13567-1-1998, IDT.
