What this standard covers

This standard specifies the classification of iron oxide pigments, requirements, naming, sampling, test methods, inspection rules and signs, packaging, transport and storage. These pigments are identified in the following color index number: Red 101 and Red 102, Yellow 42 and Yellow 43 Brown Brown 6 and 7, and black 11, including rapid dispersion of pigments. Does not include micaceous iron oxide pigments, transparent iron oxide pigments, iron gray and grainy color index number in addition to black and 11 outside of the magnetic iron oxide pigment pigments. This standard applies to general use of iron oxide pigments, mainly used in coatings, construction, paper, rubber and plastics industries.

Document data

International classification (ICS): 87.060.10.

Chinese classification (CCS): G54.

Estimated length of the Chinese original: 22,247 words.

Adopted international standard: ISO 1248-2006, MOD.

Supersedes the earlier edition GB/T 1863-1989.
