What this standard covers

This standard specifies a filtering method. This standard applies to the formation of composite machining surface, such surface roughing and finishing left the valley formed by the synthesis of a smooth surface. For these surfaces GB/T 18777-2002 (ISO 11562) required baseline filter the results would be adversely affected ravine. Described in this standard filtering suppresses the influence valley, resulting in a more suitable baseline.

Document data

International classification (ICS): 17.040.20.

Chinese classification (CCS): J04.

Estimated length of the Chinese original: 8,891 words.

Adopted international standard: ISO 13565-1-1996, MOD.
