

ICS 35.220.30  
CCS L 64

**NATIONAL STANDARD OF THE  
PEOPLE'S REPUBLIC OF CHINA**

**GB/T 18807-2002**

---

**Information technology -- Data interchange on 130mm optical  
disk cartridges ?C Capacity -- 1.3 gigabytes per cartridge  
(English Translation)**

**Issued on: August 9, 2002**

**Implemented on: April 1, 2003**

---

**Issued by: General Administration of Quality Supervision, Inspection and  
Quarantine of the People Republic of China**

### What this standard covers

This standard specifies: Conformance testing conditions, optical disk cartridge operation, storage environment, optical disk cartridges and cartridge mechanical properties, physical properties and geometry, in order to protect the data processing system of the mechanical interchangeability, plate molding the format of the written information and the user, including channel and the physical location of the sector, using the error correction code and modulation, nature of the information on the disc molding, magneto-optical disk characteristics to the processing system, data can be written to the plate, plate minimum quality user writes data to enable the data processing system reads data from the disk. This standard specifies the interaction between the optical drive swap. This standard with a volume and file structure on the text of the standard provides a data processing system with full data exchange between.

### Document data

International classification (ICS): 35.220.30.

Chinese classification (CCS): L64.

Estimated length of the Chinese original: 81,831 words.

Adopted international standard: ISO/IEC 13549-1993, IDT.
