

ICS 83.06
CCS G 40

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 18864-2002

**Rubber, vulcanized -- Antistatic and conductive products for
industrial use -- Electrical resistance limits**

(English Translation)

Issued on: October 15, 2002

Implemented on: April 1, 2003

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People Republic of China**

What this standard covers

This Standard specifies certain products and the electrically conductive product as an antistatic resistor limits industrially. The standard resistance range are generally applicable to the products listed in Table 1, if the products are relevant standards, resistance range and test methods shall be subject to the relevant standards of the product. This standard is not applicable to the relevant surface of a conductive region and an insulating region composed of a mixture of products, nor does it apply to the basic surface of an insulating material products. The standard test uses an electrode system were determined on the finished product, the test system used for factory inspection and maintenance tests.

Document data

International classification (ICS): 83.06.

Chinese classification (CCS): G40.

Estimated length of the Chinese original: 5,529 words.

Adopted international standard: ISO 2883-1980, IDT.
