Foreword

GB/T 18874.5-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 28 January 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 August 2026.

This edition replaces GB/T 18874.5-2002.

The document adopts an international standard (ISO or IEC).

It is under the responsibility of the China Machinery Industry Federation.

Classification: ICS 53.020.20; CCS J 80.

1 Scope

Buying a crane involves a detailed exchange of technical information between the customer and the supplier. This standard, Part 5 of the series on cranes, concerns the information to be provided for bridge and gantry cranes. It supports clear enquiries, quotations and contracts for these crane types. It is a recommended national standard.

Crane manufacturers, project engineers, plant owners, procurement staff, consultants and installers can use it as a checklist when preparing or evaluating specifications. It is intended to reduce misunderstandings at the tendering stage and so helps both buyers and suppliers.

The 2026 edition was issued on 28 January 2026 and took effect on 1 August 2026, so it is already in force. It replaces GB/T 18874.5-2002. Organisations that still use older enquiry templates should check them against the current text.
