What this standard covers

This standard applies to the time relay, as in IEC 60050 (446) set forth in the definition of industrial use (ie, control, automation, signaling and industrial equipment) delay relay. Use this section of the " relay " includes all kinds of relays with a timer, but does not include measuring relays. According to the time relay applications (eg: electricity production, transmission and distribution, etc.), will adopt more standard.
